Certified Cardiac/Telemetry Monitoring

Dedicated CPR Certified healthcare professional with over 3years of experience delivering excellent patient care, nursing operations, and regulatory compliance; extensive knowledge of medical illnesses and treatments, hospital policies and procedures, and standards of quality care. Demonstrated ability to implementing and supervising nursing care plans as dictated in the patient's chart, document actions and findings and report urgent care needs. Patient focused leader with superior ability to interface with patients, family, and health care providers to implement care plans. Seeking to utilize diverse background on a demanding telemetry unit; and transition into an equally challenging Labor and Delivery unit with an organization that values efficiency and patient satisfaction.
